

How To Transpose Ukulele Music to Fit Your Voice

Ever find a song you just couldn't sing because it was too high or too low for your voice? Well we can fix that for you by transposing the music to fit your voice!

- 1) Find the column for the Key your music is in
- 2) Find the column for the Key you want the song to be in.
- 3) Change all the notes from the key your in to the key you want to be in

	← R O W →											
↑	1	2	3	4	5	6	7	8	9	10	11	12
C	C	D _b	D	E _b	E	F	G _b	G	A _b	A	B _b	B
O	D	E _b	E	F	F _#	G	A _b	A	B _b	B	C	C _#
L	E	F	F _#	G	G _#	A	B _b	B	C	C _#	D	D _#
U	F	G _b	G	A _b	A	B _b	C _b	C	D _b	D	E _b	E
M	G	A _b	A	B _b	B	C	D _b	D	E _b	E	F	F _#
N	A	B _b	B	C	C _#	D	E _b	E	F	F _#	G	G _#
	B	C	C _#	D	D _#	E	F	F _#	G	G _#	A	A _#
↓	C	D _b	D	E _b	E	F	G _b	G	A _b	A	B _b	B

For example, let's say your music is in the key of *C* and you want to change it to the key of *G*. The column for the key of *C* is column 1, the column for the key of *G* is column 8, you simply change the notes listed in column 1 to the note from the same row that is in column 8.

Row →		
Column ↓	1	8
Keys	<i>C</i>	<i>G</i>
D becomes A	D	A
E becomes B	E	B
F becomes C	F	C
G becomes D	G	D
A becomes E	A	E
B becomes F#	B	F#
C becomes G	C	G

Now wasn't that easy?
